

Sharrows

“Sharrow” markings indicate a shared lane for people on bikes and in cars. Sharrows assist with bike positioning on streets and encourage motorists to safely pass people on bikes.

People on bikes:

- » Sharrows are a guide to help you position yourself safely in the travel lane. Ride in the same direction of traffic.
- » Be aware of others, especially vehicles making turns. At intersections, position yourself toward the center of the lane to avoid being squeezed by vehicles making right turns.
- » Use caution and appropriate hand signals when stopping and making turns.
- » Obey all traffic laws.

People in vehicles:

- » Expect to see people riding bikes on the road with you.
- » Leave at least three feet of space when passing people riding bikes; change lanes to pass if necessary.
- » Do not use your horn when approaching or passing, except to warn of danger.
- » Obey all traffic laws.
